Vision

Everyone connected to the people, services and information
they need to get well and stay healthy

Network connectivity is key

Past

Optimizing inpatient care

Future

Restricted volumes of inpatient care

Wider spectrum of ambulatory care needs

Much higher volumes of tech mediated interactions

Future organization of Care

Inpatient Care

*

Critically Ill
Complex
Procedures

*

MD driven

"Hospital" @ Home (inpt services @ home)

*

Lower acuity care &
Procedures

*

MD driven

Smart Care Communities

(Geo.ecosystems
of care)

*

Post Acute Care
Facilitate CDSM+

*

NP/ N driven
Midlevel providers
CHW/PN

Smart Care

Smart Homes

- Prev Focused (pri, sec & tert) ecosystems

- Facilitate independent living
- Enhance patient and caregiver support
- Algo/ML/Cognitive Computing driven
- MD/NP Overseen/developed

mHealth

- Focus: Health Promo/Wellness ecosystems
- Smart Cars, wearables, Apps, Alexa
- Place independent care,

Virtual Care

- Focus: "On Demand" interactions/Care triage

Command Centers

- Health Services Traffic Control

Institutional connectivity

Access to care

FCC Seeking Public Comment

Accelerating Adoption and Availability of Broadband-enabled health technologies, services and solutions
