Collaboration between researchers and states has a history of producing fruitful findings that contribute to shaping addiction treatment systems. During this pre-conference session, presenters will build on their experience with these collaborations to present information on the range of opportunities for such relationships: the strengths that each party brings to the table; federal, state and foundation sources of funding; practical advice for researchers on how to identify appropriate state agencies and for states on how to identify interested researchers; how to initiate and build a partnership; and examples of specific projects. A panel of several sets of researchers and state representatives who have worked together will discuss the opportunities, advantages, rewards and challenges of their partnerships. By bringing together researchers and state representatives in this session, there will be an opportunity for targeted networking.

Topics include setting priorities for the range of opportunities that arise across research, teaching and service; collaborating with other researchers; collaborating with community settings; writing manuscripts and grant reviews; identifying and evaluating grant opportunities. Ample time for questions and discussion.

# Mentoring

Brandeis-Harvard NIDA Center Mentoring ProgramThe NIDA Center facilitates mentoring opportunities at Addiction Health Services Research Conference, as well as other national conferences, in order to connect doctoral students and early-career investigators with senior, expert researchers in health services research. Mentees use this opportunity to address a range of topics, including career development, networking, and proposal planning to kick-start an ongoing relationship and future opportunities for collaboration.
