

**Is your sample ready to be submitted for
drug checking?**

Better samples, better results!*

*Providing more sample of better quality allows for more complete testing. See back for more details.

Scan QR code for more information about drug checking!

- Is your sample in a wax fold or baggie?
- Or is it in a cotton, cooker, or pipe that has **only been used once**?
- Are the contents of your sample **visible**?

If **yes**, we can test it!

Community drug checking is provided by the Massachusetts Drug Supply Data Stream (MADDS), a state-funded collaboration between Brandeis University, the Massachusetts Department of Public Health, and local harm reduction agencies.

How much is enough?
At least half a grain of rice!
