

Advancements in opioid safety have been made in recent years. Educational tools can help bridge knowledge gaps and increase skills in addressing opioid safety. The RESPOND TO PREVENT online courses includes:

- Evidence-based best practice recommendations
- Simulated pharmacist-patient videos
- Downloadable support tools
- Pharmacists earn 1.75 contact hours for course completion

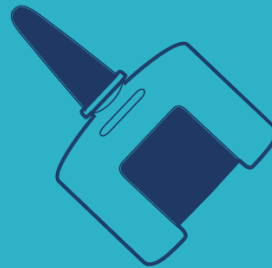

The RESPOND TO PREVENT training modules provide pharmacists with the opportunity for continuing pharmacy education (CPE) accreditation.

Three FREE modules include:

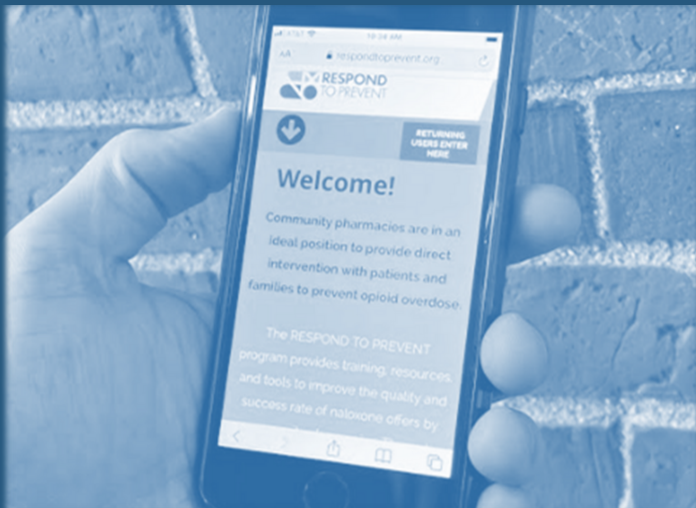

**Syringe
Safety**

**Naloxone
Dispensing**

**Prescribing
Buprenorphine**

Module Feedback

Participants stated:

- **97%** would recommend this training to a colleague.
- **98%** felt more knowledgeable after completing the CPE activity.
- **99%** agreed the training helped them identify patients at potential risk for opioid overdose.
