

# RCRC Health Systems Learning Network

The RCRC Health Systems Learning Network provides an opportunity for health system leaders to check in and advise one another about their change efforts, facilitated by Tony Suchman of Relationship Centered Health Care, Marjorie Godfrey of The Dartmouth Institute Microsystems Academy, and Jody Hoffer Gittel of Brandeis University and the RCRC.

Participation in the Learning Network is open to health systems that are Organizational Partners of the RCRC. The RCRC partner community offers additional opportunities to learn from and share your work with colleagues in the healthcare sector and beyond.

## Virtual Meetings

### COVID-19 Rapid Response Sessions

Weekly 30 minute calls  
Sharing real-time learning with health system leaders  
Launched April 2020

### Structured Ongoing Sessions

Bi-monthly 60 minute calls  
Standard agenda with hot topics, updates and advising  
Networking between sessions as desired  
Tentative launch July 2020

## About the Learning Network

A growing body of evidence suggests that relational coordination supports worker well-being and high performance outcomes in the evolving and complex environment of the healthcare sector. In response to the needs of our practitioner partners in the healthcare sector, the RCRC launched the Health Systems Learning Network.

This Learning Network provides an opportunity for health system leaders to check in and learn from one another about challenges they are facing and innovations that are emerging. On the other side of the pandemic crisis, we will move to less frequent meetings with more active coaching, ready to design more lasting solutions based on what we've learned.

We hope that you will consider joining us in the network. We feel strongly that your experiences will be of great interest to the group and that you will benefit from what others will share.

**The Relational Coordination Research Collaborative (RCRC)**  
is a learning community based at the Heller School  
for Social Policy & Management at Brandeis University.

**Relational coordination is communicating and relating for the purpose of task integration.**

These mutually reinforcing communication and relationship ties form the basis for coordinated collective action, driving performance outcomes.

Relational coordination is a powerful driver of performance when work is interdependent, uncertain and time constrained.
