Additional Organizations

**Note:** These organizations are doing work related to AI/tech ethics, diversity/inclusion in tech, or AI/data policy. Several organizations that do not primarily focus on these areas, but are pursuing or funding related projects have also been included, as have some organizations that do more general work at the intersection of technology and human rights. Some of the major AI research organizations are also listed. This list was originally compiled a year or two ago, so links should be double-checked to ensure they are still live.
